1. Overview

1.1. Highlights & Features

- Safety approvals supporting a broad range of medical and industrial applications
- Wide operating AC & DC input range, dual pole fusing
- Wide adjustable output range, 20% boost current for 10 sec.
- Industry standard housing format, identical mechanical shelf interface, 1U (40,6mm) x 5" (127mm) with scaling in depth
- Various protections ensure safe and reliable operation
- Integrated decoupling protects output from back feeding currents
- Remote controllable and diagnosable via 0V/5...24V signal, via LED, CANopen, Modbus RTU over RS485
- Pre-equipped fans, fanless operation, low output noise are additional features
- Multiple units can be connected in parallel and/or series configuration

1.2. General Description

The mPSU is a modular family of superior power supplies for medical and industrial applications. It covers a power range from 150 W to 1500 W and includes the frequently requested 24 V and 48 V outputs. With its wide input and output range, the mPSU can be used universally in a variety of applications. An additional 20% boost current for 10 seconds supports the startup of heavy loads.

All models are powered by a single-phase AC or DC supply. A three-phase, 600-W variant complements the offering. An external upstream fuse is required for three-phase models.

The devices are all designed in a standard 1U format with an identical mechanical shelf interface. The depth of the devices increases with output power.

Support for CANopen and Modbus RTU via RS485 allows for seamless integration into end application control and enables device parametrization, as well as the exchange of data for device supervision.

1) Means of patient protection

2) For 2 or more mPSUs connected in series, refer to 7 "Parallel and Serial Connection", p. 10.

3) Means of operator protection

7. Parallel and Serial Connection

Up to 4 Power Supplies can be connected in parallel (4P) without the need for external OR-ing diodes for decoupling. But when more than 2 PSUs are connected in parallel, external fusing is required in the system. This is to protect the power output circuitry against backward over current from other PSUs in case of a first fault condition (output short circuit) of any single PSU.

Up to 4 Power Supplies can be connected in series (4S) if the combined output voltage is less than 120Vdc with respect to Protective Earth. Please note the limitation to 2x MOOP (instead of MOPP) if combined output voltage exceeds 60Vdc.

Please refer to the application note for further details for parallel and serial connection capabilities.

8. PMI – Power Management Interface (X4, X5)

Fig. 4: PMI interface (X4, X5)

The Power management Interface (PMI) provides connectors X4 and X5 with parallel connected signals for CANopen, Modbus RTU over RS485 and analog signals for Inhibit, Power Good and Aux Supply.

8.1. Ratings / Characteristics (X4, X5)

Model Number		mPSU-W1AC-xxDC-600

9. Acoustical Fan Noise

The mPSU fan operates using a self-adapting, temperature-controlled system that adjusts to the thermal ambient and output power. This prevents beat frequencies during operation.

Model Number		mPSU-W1AC-xxDC-600
Acoustical Fan Noise		
Fan 1 and Fan 2 speed 0%		< 20 dB(A)
Fan 1 and Fan 2 speed ~30%		< 30 dB(A)
Fan 1 and Fan 2 supporting 100% output power @ T _a = +50 °C (+122 °F)		< 50 dB(A)

Condition: acoustical half space, 1 m (3.3 ft)

10. Mechanical

Model Number		mPSU-W1AC-xxDC-600
Mechanical		
Case Chassis		SECC Zink plated steel
Case Cover		SECC Zink plated steel
Dimensions (L x W x H)		see section 17.1 "Dimensions", p. 17
Unit Weight		1.24 kg (2.73 lb)
Indicators		RXD LED green: CANopen or Modbus RTU communication; PGD LED green: Power Good
Controls		Rotary Switch 16 positions setting CANopen / Modbus RTU node ID
Cooling System		Forced cooling with integrated fans
Terminals		See chapters 4 "AC/DC Input Connector (X1)", p. 6, 5 "Main DC Output Connector (X2)", p. 8, 8 "PMI – Power Management Interface (X4, X5)", p. 11
Locking / Screw mounting		Latch Lock Lever and M3 mounting thread holes in mPSU enclosure sidewalls

11. Environment

Model Number		mPSU-W1AC-xxDC-600
Environment		
Surrounding Air Temperature	Operating	100% Power: -20 to +50 °C (-4 to +122 °F); 50% Power: +50 to +70 °C (+122 to +158 °F)
	Storage	-40 to +85 °C (-40 to +185 °F)
Power De-rating		see section 18 "Curves", p. 18
Relative Humidity	Operating	20 to 90% (non-condensing)
	Storage	5 to 95%
Altitude	Operating	3000 m (9842 ft)
Shock Test	Non-Operating	IEC 60068-2-27: 50 G, 11 ms, 3 shocks in each direction
Vibration	Non-Operating	IEC 60068-2-6: 2.09 G _{rms} , 5 - 500 Hz, 20 minutes per side (3 planes)
Over Voltage Category		CAT II (IEC 60664-1)
Pollution Degree		II

12. Protections

Model Number	mPSU-W1AC-24DC-600	mPSU-W1AC-48DC-600
Protections		
Overvoltage	< 32.0 V _{DC} shut down and latch	–
Over Current / Short Circuit ¹⁾	Limit to adjustable value of constant current (CC Mode) with up to +5% tolerance	
Over Load ¹⁾	Thermal Hiccup in CC mode when thermal shutdown is reached	
Over Temperature ¹⁾	Shut off main output, auto recovery with 10 k temperature hysteresis	

1) Thermal hiccup cycling stops after 2 minutes, restart after INH (Inhibit) cycle possible

13. Reliability Data

Model Number		mPSU-W1AC-xxDC-600
Reliability Data		
MTBF (Mean Time Between Failures)	SN29500	> 690.000 h @ T _a = +25 °C (+77 °F)
